

Persamaan Perakaunan (The Accounting Equation)

Fail Excel: [prinsip-akaun/excel/Persamaan_Perakaunan.xlsx](#). Contoh di bawah dijana daripada tab Contoh (oren). Soalan 1 dan Soalan 2 boleh disemak sendiri dalam tab biru.

Excel file: the example below comes from the orange Contoh (Example) tab. Questions 1 and 2 mark themselves on the blue tabs.

Semua amaun dalam Ringgit Malaysia (RM). *All amounts are in Malaysian Ringgit (RM).*

Bahasa Melayu dahulu, kemudian *English dalam huruf condong*. *Malay comes first, then English in italics.* Glosari penuh / full glossary: [Glosari_PA.md](#)

1. Objektif pembelajaran (Learning objectives)

Pada akhir topik ini, anda dapat: *By the end of this topic, you will be able to:*

1. Menerangkan maksud aset, liabiliti dan ekuiti pemilik. *Explain assets, liabilities and owner's equity.*
2. Menyatakan persamaan perakaunan. *State the accounting equation.*
3. Menunjukkan kesan urus niaga ke atas aset, liabiliti dan ekuiti pemilik. *Show the effect of transactions on assets, liabilities and owner's equity.*
4. Menghitung item yang tidak diketahui dalam persamaan perakaunan. *Calculate a missing item in the accounting equation.*
5. Menyediakan Penyata Kedudukan Kewangan ringkas daripada persamaan perakaunan. *Prepare a simple Statement of Financial Position from the equation.*

2. Istilah penting (Key terms)

Istilah (Term)	Maksud	Meaning in English	Contoh (Examples)
Aset (Assets)	Sumber ekonomi yang dimiliki dan dikawal oleh perniagaan dan memberi faedah pada masa hadapan	Resources the business owns and controls that give future benefits	Premis, kenderaan, perabot, inventori, Akaun Belum Terima, bank, tunai (<i>premises, vehicles, furniture, inventory, trade receivables, bank, cash</i>)
Liabiliti (Liabilities)	Tanggungan atau hutang perniagaan kepada pihak luar	Debts the business owes to outsiders	Akaun Belum Bayar, pinjaman bank, overdraf bank, belanja belum bayar (<i>trade payables, bank loan, bank overdraft, accrued expenses</i>)
Ekuiti pemilik (Owner's equity)	Tuntutan pemilik ke atas aset perniagaan selepas ditolak liabiliti	The owner's claim on the assets after liabilities are taken away	Modal, untung bersih (tolak ambilan) (<i>capital, net profit, less drawings</i>)
Hasil (Revenue / income)	Pendapatan perniagaan yang menambah ekuiti pemilik	Income that increases owner's equity	Jualan, komisen diterima, sewa diterima (<i>sales, commission received, rent received</i>)
Belanja (Expenses)	Kos menjalankan perniagaan yang mengurangkan ekuiti pemilik	Running costs that decrease owner's equity	Gaji, sewa, kadar bayaran, elektrik (<i>wages, rent, rates, electricity</i>)
Ambilan (Drawings)	Wang atau barang yang diambil oleh pemilik untuk kegunaan sendiri. Mengurangkan ekuiti pemilik	Money or goods the owner takes for private use. Decreases owner's equity	Pemilik mengambil tunai (<i>owner takes cash</i>)

3. Persamaan perakaunan (The accounting equation)

Aset = Liabiliti + Ekuiti Pemilik

Assets = Liabilities + Owner's Equity

Persamaan ini sentiasa seimbang kerana setiap aset dibiayai sama ada oleh pihak luar (liabiliti) atau oleh pemilik (ekuiti pemilik).

The equation always balances because every asset is paid for either by outsiders (liabilities) or by the owner (owner's equity).

Bentuk lain persamaan (Other forms of the equation):

- Ekuiti Pemilik = Aset – Liabiliti (*Owner's equity = Assets – Liabilities*)
- Liabiliti = Aset – Ekuiti Pemilik (*Liabilities = Assets – Owner's equity*)

Persamaan perakaunan yang dikembangkan (The expanded accounting equation):

Aset = Liabiliti + Modal + Hasil – Belanja – Ambilan

$$\text{Assets} = \text{Liabilities} + \text{Capital} + \text{Income} - \text{Expenses} - \text{Drawings}$$

- Hasil – Belanja = Untung bersih (atau rugi bersih jika belanja lebih besar). *Income – Expenses = Net profit (or net loss if expenses are bigger).*
- Ekuiti pemilik akhir = Modal awal + Modal tambahan + Untung bersih – Ambilan. *Closing owner's equity = Opening capital + Additional capital + Net profit – Drawings.*

4. Kesan urus niaga (Effects of transactions)

Setiap urus niaga memberi kesan kepada **sekurang-kurangnya dua item**. Selepas setiap urus niaga, jumlah aset tetap sama dengan jumlah liabiliti dan ekuiti pemilik.

Every transaction affects at least two items. After each transaction, total assets still equal total liabilities plus owner's equity.

Kunci (Key): Bertambah = *increase*. Berkurang = *decrease*. Tiada kesan = *no effect*.

Urus niaga (Transaction)	Aset (Assets)	Liabiliti (Liabilities)	Ekuiti pemilik (Owner's equity)
Pemilik memulakan perniagaan dengan wang tunai (<i>owner starts the business with cash</i>)	Bertambah (tunai/bank)	Tiada kesan	Bertambah (modal)
Membeli aset secara tunai atau cek (<i>buy an asset by cash or cheque</i>)	Bertambah dan berkurang (jumlah aset tidak berubah) (<i>one up, one down, total unchanged</i>)	Tiada kesan	Tiada kesan
Membeli aset atau barang niaga secara kredit (<i>buy an asset or goods on credit</i>)	Bertambah	Bertambah	Tiada kesan
Menjual barang niaga dengan untung (<i>sell goods at a profit</i>)	Bertambah (kos keluar, harga jualan masuk) (<i>cost out, selling price in</i>)	Tiada kesan	Bertambah (untung) (<i>profit</i>)
Menerima pinjaman (<i>receive a loan</i>)	Bertambah	Bertambah	Tiada kesan
Membayar belanja (gaji, sewa) (<i>pay an expense: wages, rent</i>)	Berkurang	Tiada kesan	Berkurang
Menerima hasil (komisen, sewa) (<i>receive income: commission, rent</i>)	Bertambah	Tiada kesan	Bertambah
Membayar Akaun Belum Bayar (<i>pay a trade payable</i>)	Berkurang	Berkurang	Tiada kesan
Membayar Akaun Belum Bayar dan menerima diskaun (<i>pay a trade payable and receive a discount</i>)	Berkurang (amaun dibayar) (<i>amount paid</i>)	Berkurang (amaun penuh) (<i>full amount</i>)	Bertambah (diskaun diterima) (<i>discount received</i>)
Menerima bayaran daripada Akaun Belum Terima (<i>receive payment from a trade receivable</i>)	Bertambah dan berkurang	Tiada kesan	Tiada kesan
Pemilik membuatambilan (<i>owner takes drawings</i>)	Berkurang	Tiada kesan	Berkurang
Pemilik menambah modal (<i>owner adds capital</i>)	Bertambah	Tiada kesan	Bertambah

Tip: diskaun diterima ialah hasil, jadi ekuiti pemilik bertambah. Diskaun diberi ialah belanja, jadi ekuiti pemilik berkurang.

Tip: discount received is income, so owner's equity increases. Discount allowed is an expense, so owner's equity decreases.

5. Contoh lengkap: Perniagaan Aiman (Full example: Aiman's business)

Urus niaga Perniagaan Aiman pada bulan Januari 2025, dan kesannya ke atas setiap item:

Aiman's transactions in January 2025, and the effect on each item. Amounts in brackets () are decreases.

Kunci lajur (Column key): Tunai = *Cash*. Inventori = *Inventory*. Perabot = *Furniture*. Akaun Belum Terima = *Trade receivables*. Akaun Belum Bayar = *Trade payables*. Pinjaman = *Loan*. Ekuiti Pemilik = *Owner's equity*.

Urus niaga dalam bahasa Inggeris (Transactions in English):

1. Started the business: RM20 000 into the bank and RM2 000 cash.
2. Bought furniture by cheque, RM3 000.
3. Bought goods on credit from Kedai Siti, RM5 000.
4. Sold goods costing RM2 000 on credit to Encik Lim for RM3 200.
5. Received a bank loan, RM10 000.
6. Paid shop rent in cash, RM800.
7. Received a cheque of RM3 000 from Encik Lim.
8. Paid Kedai Siti RM4 800 by cheque and received a discount of RM200.
9. Owner took RM500 cash for private use (drawings).
10. Owner added capital: RM5 000 paid into the bank.

The last row, Baki akhir, means *closing balance*.

Urus niaga	Tunai	Bank	Inventori	Perabot	Akaun Belum Terima	Akaun Belum Bayar	Pinjaman	Ekuiti Pemilik
1. Memulakan perniagaan: RM20 000 ke bank dan RM2 000 tunai	2,000	20,000	0	0	0	0	0	22,000
2. Membeli perabot dengan cek RM3 000	0	(3,000)	0	3,000	0	0	0	0
3. Membeli barang niaga secara kredit daripada Kedai Siti RM5 000	0	0	5,000	0	0	5,000	0	0
4. Menjual barang niaga berkos RM2 000 secara kredit kepada Encik Lim, RM3 200	0	0	(2,000)	0	3,200	0	0	1,200
5. Menerima pinjaman bank RM10 000	0	10,000	0	0	0	0	10,000	0
6. Membayar sewa kedai secara tunai RM800	(800)	0	0	0	0	0	0	(800)
7. Menerima cek RM3 000 daripada Encik Lim	0	3,000	0	0	(3,000)	0	0	0
8. Membayar Kedai Siti dengan cek RM4 800 dan menerima diskaun RM200	0	(4,800)	0	0	0	(5,000)	0	200
9. Pemilik mengambil tunai RM500 untuk kegunaan sendiri	(500)	0	0	0	0	0	0	(500)
10. Pemilik menambah modal: RM5 000 dimasukkan ke bank	0	5,000	0	0	0	0	0	5,000
Baki akhir	700	30,200	3,000	3,000	200	-	10,000	27,100

Semakan: Aset = Liabiliti + Ekuiti Pemilik (*Check: Assets = Liabilities + Owner's equity. Perbezaan (mesti 0) = difference, must be 0*)

Item	Jawapan
Jumlah Aset (RM)	37,100
Jumlah Liabiliti + Ekuiti Pemilik (RM)	37,100
Perbezaan (mesti 0)	-

6. Penyata Kedudukan Kewangan daripada persamaan perakaunan (Statement of Financial Position from the equation)

Baki akhir dalam jadual di atas terus menjadi Penyata Kedudukan Kewangan.

The closing balances in the table above become the Statement of Financial Position.

Kunci (Key): Penyata Kedudukan Kewangan = *Statement of Financial Position*. Butir = *Particulars*. Jumlah Aset = *Total assets*. Pinjaman bank = *Bank loan*. Jumlah Liabiliti dan Ekuiti Pemilik = *Total liabilities and owner's equity*.

Perniagaan Aiman

Penyata Kedudukan Kewangan pada 31 Januari 2025

Butir	RM	RM	RM
Aset			
Perabot		3,000	
Inventori		3,000	
Akaun Belum Terima		200	
Bank		30,200	
Tunai		700	
Jumlah Aset			37,100
Liabiliti			
Pinjaman bank		10,000	
Akaun Belum Bayar		-	
Jumlah Liabiliti			10,000
Ekuiti Pemilik			27,100
Jumlah Liabiliti dan Ekuiti Pemilik			37,100

7. Menghitung item yang tidak diketahui (Calculating a missing item)

Contoh 1 (Example 1): Aset RM96 500, liabiliti RM31 200. *Assets RM96 500, liabilities RM31 200.*

Ekuiti pemilik = $96\,500 - 31\,200 = \text{RM}65\,300$ (*Owner's equity = assets – liabilities*)

Contoh 2 (Example 2): Modal awal RM48 000, modal tambahan RM5 000, hasil RM36 500, belanja RM21 800, ambilan RM6 200.

Opening capital RM48 000, additional capital RM5 000, income RM36 500, expenses RM21 800, drawings RM6 200.

- Untung bersih = $36\,500 - 21\,800 = \text{RM}14\,700$ (*Net profit = income – expenses*)
- Ekuiti pemilik akhir = $48\,000 + 5\,000 + 14\,700 - 6\,200 = \text{RM}61\,500$ (*Closing owner's equity*)

8. Kesilapan biasa (Common mistakes)

- Menganggap pembelian aset secara tunai menambah jumlah aset. Satu aset bertambah dan satu lagi berkurang dengan jumlah yang sama. *Thinking a cash purchase of an asset raises total assets. One asset goes up and another goes down by the same amount.*
- Lupa kesan diskaun: liabiliti berkurang dengan **amaun penuh**, aset berkurang dengan **amaun yang dibayar**. *Forgetting the discount: liabilities fall by the full amount, assets fall by the amount paid.*
- Menganggap ambilan sebagai belanja. Ambilan mengurangkan ekuiti pemilik tetapi bukan belanja perniagaan. *Treating drawings as an expense. Drawings reduce owner's equity, but they are not a business expense.*
- Merekod keseluruhan harga jualan sebagai untung. Untung ialah harga jualan tolak kos. *Recording the whole selling price as profit. Profit is selling price minus cost.*

9. Semak kefahaman (Check your understanding)

1. Pemilik memasukkan wang peribadi RM8 000 ke dalam bank perniagaan. Nyatakan kesannya. *The owner puts RM8 000 of personal money into the business bank account. State the effect.*
2. Aset RM120 000 dan ekuiti pemilik RM85 000. Berapakah liabiliti? *Assets are RM120 000 and owner's equity is RM85 000. What are the liabilities?*
3. Barang niaga berkos RM900 dijual secara tunai dengan harga RM1 300. Nyatakan kesannya. *Goods costing RM900 are sold for cash at RM1 300. State the effect.*

Jawapan (Answers):

1. Aset bertambah RM8 000, ekuiti pemilik bertambah RM8 000. *Assets increase by RM8 000, owner's equity increases by RM8 000.*
2. RM35 000.
3. Aset bertambah RM400 (tunai +1 300, inventori –900), ekuiti pemilik bertambah RM400. *Assets increase by RM400 (cash +1 300, inventory –900), owner's equity increases by RM400.*
